SEWERAGE of LONDON.—The attention of the COMMISSIONERS appointed to determine upon the most efficient material for the Construction of the Newers of London is particularly directed to the ASPHALTE of SEYSSEL, which, more than any other material, is applicable to the construction and internal coating of Brick Culverts, and other channels for drainage. The experiments made by the Royal Artillery on the Embankments of Plymouth Citadel, constructed of Seyssel Asphaltic Brickwork, under the orders of the Honourable Board of Ordnance, have fully proved the superiority, adhesiveness, and strength of Seyssel Asphalte over all other cementitious compositions.—A printed Report of those experiments can be had on application to J. FARRELL, Secretary, Seyssel Asphaltic Company, "Claridge's Patent." Established 1838.

Note.—The application of the Asphalte of Seyssel is specially recommended by the Commissioners on the Fine Arts, for covering the groined line of Brickwork in vaulted situations, and it has been suggested that it would be peculiarly applicable for covering the Arcus of closed Graveyards, and for the construction of Catacombs.

JORDAN'S PATENT MACHINE CARVING and MOULDING WORKS for WOOD and STONE, Belvedere-road, Lambeth, and 134, Strand.—TAYLOR, WILLIAMS, and JORDAN beg to call the attention of the building community to a new feature of their establishment, and, the new term, to thank their numerous friends for the very liberal support they have lately experienced, which, they assure them and the public, it will be their constant endeavour to deserve, by giving their customers an increased share of the advantages arising from the consent in principle of their machinery, which they have now matured, and by applying to the production of the most intricate carving in Caen and other freestones, and in statuary marble.

T., W., and J. particularly solicit the attention of architects and builders to the fact that, by the use of this machinery, a very large amount both of time and money is saved—a great, indeed, that in many cases they can deliver a well-finished article in Caen stone for less money than it can be obtained in cement, while their wood-carving will, in some cases, be found to come into close competition with the best kinds of composition ornament.—For prices and estimates apply at the Strand.

TESTIMONIAL FROM CHARLES BARRY, ESQ.

"Westminster, May 18th, 1849.

"CHARLES BARRY."
